

Monte Construction came to our rescue! We undertook a major refurbishment and extension just before moving to Australia. Unfortunately for us the builder we used was less than credible and issues soon started to appear. Several water and damp issues became severe to the point where walls and floors were rotting, paint was peeling, and mold appearing in many places. The house had become inhabitable and the angry tenants soon had to move out. It was an extremely stressful situation especially given we weren't in the country to deal with it. We had to find another builder from abroad without being able to meet with them, and having already been burnt it was going to be difficult to find someone we could trust. We were then lucky to have Monte Construction recommended to us and from that moment the stress levels dropped dramatically. Mantas has been extremely professional, polite and helpful throughout the process as we have carried out the complete refurbishment via email. The huge job included re-tiling the roof; fixing an ill fitted V-lux; removing, leveling and replacing floors; replacing doors and doorways; a complete re-plumbing and part re-wiring of the property; damp-proofing a wall; and then all the redecoration (including tiling, preparation and painting, carpetting etc). All the work has been done to a very high standard and Mantas was kind enough to send us regular updates with many photos so we could always see how things were progressing. The finished job is fantastic (so much better than from our previous builder) and the price has been extremely reasonably for the amount of work carried out and the level of finished achieved. Without hesitation we would recommend Monte Construction as an honest and reliable building company with good prices and high quality finishing."

Cheers

Phillip
